BOOK SYNOPSIS

With the low cost of modern computer hardware and software combined with the communication of price data via satellite, a new and rapidly expanding market of traders using computers has developed. This essential book bridges the gap between the basic instruction that comes with software programs and what a trader actually needs to know to develop and test profitable futures trading system. With specific information on how to set up and use computer-generated technical studies of the most popular indicators, the book includes: How to build a trading system tailored to the readers specific need; Practical instruction on how to display and analyze technical information; Advice for developing well disciplined money management and risk control strategies; techniques for monitoring a trading system to detect if something has gone wrong before major losses occur.
